# CRUSHER BEADINGS

Crusher Beadings are specially designed and manufactured for Crushing machines and metallurgy industry for protecting the crusher screens against vibrations and shock during operations. It is widely used in vibrating screen to avoid metal to metal contact. It helps in improving the service life of vibrating screen by absorbing the vibrations.

## Features

The key feature of Crusher beadings is easy to install. They are flexible but strong. They Can adapt to different weather conditions, Long lasting, UV stability, Excellent resistance to cracking, Highly elastic Ability to bear high impact, shock and vibration.

## Applications

The Crusher beadings are mainly used in Crushing machines. They have Ability to bear high impact, shock and vibration.

The Crusher beadings are available in different grades and sizes. Raw Materials used for beadings are Natural Rubber, Neoprene Rubber, Silicon Rubber, EPDM Rubber ...etc. and Different Models are available as per the demand.
